

EZ UP®

PNEUMATIC LIFT TABLE

Bishamon®

The Bishamon EZ-UP is the ideal lifting and work positioning solution whenever operator control is required and shop air is convenient. Incorporating many of the same advanced ergonomic features as the popular EZ Loader (captive air pallet positioners), the EZ-UP utilizes constant shop air, allowing the operator to position the load for loading or unloading. The integral rotator ring eliminates the need to reach, stretch or walk around the pallet, making the EZ-UP an unsurpassed ergonomic tool that helps increase productivity at your facility. Pneumatic lifts contain no electrical or hydraulic components, and require little maintenance. They provide the ideal tool where cleanliness is a must and where sparks can be hazardous.

Lift tables in general position the work closer to the worker, which reduces the risk of injury, worker fatigue, or the chance of damage to sensitive products that are work in process. Typical applications are found in most any manufacturing, processing or distribution facility.
