

Nutting Carts & Trailers

Nutting Carts and Trailers manufactures durable, customizable solutions built to meet the demands of your operation. Trusted since 1891, we design carts that integrate seamlessly into your workflow and keep your business moving forward.

Third Party Logistics (3PL) Solutions

Managing complex supply chains demands equipment that keeps operations moving smoothly. Our durable carts are designed to support high-volume order fulfillment, cross-docking, and last-mile delivery preparation, ensuring seamless transitions between receiving, storage, and shipping. Whether handling bulk shipments or organizing time-sensitive goods, our adaptable solutions fit perfectly into your workflow. With a focus on reliability and flexibility, these carts help you stay ahead of deadlines and deliver on every commitment.

Order Picker Carts & Platforms

Order picker platform carts are designed to assist in retrieving and transporting products directly from warehouse shelves. Their sturdy build and customizable platforms make them ideal for high-volume picking operations and replenishment tasks.

- Ensure stable transport of picked products to staging areas.
- Assist in keeping essential inventory accessible at all times.
- Enable multi-level storage for diverse product sizes.

Tugger Carts

Tugger carts are engineered for towing large loads across large facilities, making them essential for material flow in production and assembly environments. They are built for durability and can be linked together in a tugger train to reduce trips and streamline workflows.

- Move returnable containers and packaging easily.
- Use for long-distance transportation across expansive warehouses.
- Minimize traffic by reducing individual trips.

KITO CROSBY™

U Boat & Utility Carts

U boat carts feature a narrow profile and dual handles, making them perfect for transporting goods through aisles and tight spaces. Commonly used in warehouses and manufacturing, these carts support fast stocking and efficient movement.

- Streamline product returns with easy handling of small loads.
- Transport small goods to and from receiving areas.

Mother Daughter Carts

Mother daughter carts are a dual-cart system, where a larger mother cart carries smaller daughter carts. This design allows for quick loading and unloading, offering efficient material transport and seamless transfers between workstations.

- Reduce downtime by pre-staging carts for upcoming operations.
- Use for delivering or retrieving grouped items.

Pallet Carts

Pallet carts provide an efficient way to move palletized goods through warehouses, production lines, and loading docks. Their rugged construction allows them to handle heavy loads and supports smooth transport in tight spaces.

- Organize pallets in tight spaces or high-density areas.
- Utilize in manufacturing or warehousing to stage raw materials or components.

Modular Carts

Modular carts are versatile carts designed to adapt to changing needs, with configurable shelves, compartments, and accessories. These carts offer flexibility in storage and transport, making them ideal for dynamic environments.

- Reconfigure shelves and compartments to fit evolving product needs.
- Optimize storage for items of various shapes and sizes.

Nutting Carts & Trailers

Nutting Carts and Trailers manufactures durable, customizable solutions built to meet the demands of your operation. Trusted since 1891, we design carts that integrate seamlessly into your workflow and keep your business moving forward.

Aerospace & Aviation Solutions

Precision and safety are essential in aerospace manufacturing and maintenance. Our carts are engineered for durability and built to handle loads ranging from 500 lbs to 300,000 lbs, ensuring seamless transport of parts, tools, and heavy equipment within your facility. Whether supporting assembly lines, organizing specialized kits, or transferring large aircraft components, our customizable solutions are designed to meet the unique demands of your operation. With equipment tailored to your workflow, every movement is optimized for efficiency and safety, so your team can focus on what matters most—keeping operations running smoothly.

Tugger Carts

Tugger carts are engineered for towing large loads across large facilities, making them essential for material flow in production and assembly environments. They are built for durability and can be linked together in a tugger train to reduce trips and streamline workflows.

- Assist with transporting unfinished products across processes.
- Use for long-distance transportation across expansive warehouses.

Mother Daughter Carts

Mother daughter carts are a dual-cart system, where a larger mother cart carries smaller daughter carts. This design allows for quick loading and unloading, offering efficient material transport and seamless transfers between workstations.

Pallet Carts

Pallet carts provide an efficient way to move palletized goods through warehouses, production lines, and loading docks. Their rugged construction allows them to handle heavy loads and supports smooth transport in tight spaces.

- Facilitate bulk movement of products within production facilities.
- Utilize in manufacturing cells to stage raw materials or components.

Modular Carts

Modular carts are versatile carts designed to adapt to changing needs, with configurable shelves, compartments, and accessories. These carts offer flexibility in storage and transport, making them ideal for dynamic environments.

- Reconfigure shelves and compartments to fit evolving product needs.
- Optimize storage for irregularly shaped or fragile items.

Kit Carts

Kit carts are designed to organize and transport pre-assembled kits, streamlining production and assembly operations.

- Use as mobile storage for repair kits and maintenance tools.
- Optimize kitting processes for efficient assembly operations.

Covered Carts

Covered carts provide reliable protection from elements for both indoor and outdoor use. Ideal for transporting goods between facilities or securely storing items, these carts ensure products stay safe and organized during every stage of the journey.

- Protect sensitive items from dust, moisture, or weather exposure.
- Transport goods between buildings or facilities securely.

AUTOMOTIVE

Automotive Solutions

The automotive industry requires reliable, durable tools that withstand heavy use. Our carts are built to handle the demands of production, assembly, and material transport, while offering customization to align with your facility's exact needs. From transferring parts between lines to managing kits for just-in-time operations, our solutions are designed to keep your processes running smoothly. Every detail is engineered to improve efficiency, so you can focus on driving performance forward.

Order Picker Carts & Platforms

Order picker platform carts are designed to assist in retrieving and transporting products directly from warehouse shelves. Their sturdy build and customizable platforms make them ideal for high-volume picking operations and replenishment tasks.
