

# CRANK-OUT CANTILEVER

*Excellent for storing heavy barstock, tube, pipe, extrusions, etc. The Crank-out Cantilever allows for overhead accessibility by extending its fully loaded arms 100% into the aisle way with an easy turn of a crank.*

BAR, PIPE, EXTRUSION STORAGE AND RETRIEVAL

# CRANK-OUT CANTILEVER

## CAN YOU AFFORD NOT TO HAVE A CRANK-OUT CANTILEVER?

**REDUCE** • • • MACHINE DOWN TIME by placing a crank-out cantilever next to a saw, laser or other fabrication machinery

• • • MAN HOURS by eliminating a forklift driver when material change over is necessary

• • • AISLE WAY SPACE by being able to load and unload a crank-out cantilever with an overhead crane

• • • MANUFACTURING FLOOR SPACE by utilizing vertical space and still gain access to multiple types of stock material

• • • INJURIES caused by man handling heavy stock material
